

MOODLE E-VOTING

MAKE THEM ACT!

WHAT IS IT?

The e-voting module enabling students to vote via their smart-phone/laptop.

Results displayed on a dynamic graph.

E-voting can be used in class to check knowledge during the course or to animate theoretical presentations.

WHY USE IT?

No installation, anonymous vote

Animate large class audiences or distant learning sessions

Increases interactions between "Professors-Students".

Supports flipped class

WHO BUILT IT?

Cyberlearn
E-learning Center HES-SO
Switzerland

HOW TO INSTALL IT?

Inform your Moodle manager
The module is available here:
https://moodle.org/plugins/-mod_evoting

Let him-her deploy it in your school Moodle environment

Create an e-voting activity like any other Moodle activity

Use it

Enjoy feedback from students

PEDAGOGY

INITIAL CONCEPTS

Ask questions affirming a scientific truth linked to the taught topic and observe how the students validate it

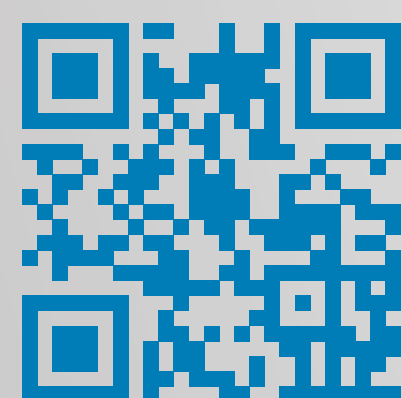

BUILD ON SOCIAL HABITS

Ask questions on any topics (tastes, expectations, course evaluation, taught topics, recall knowledge, etc.)

FLIPPED CLASS

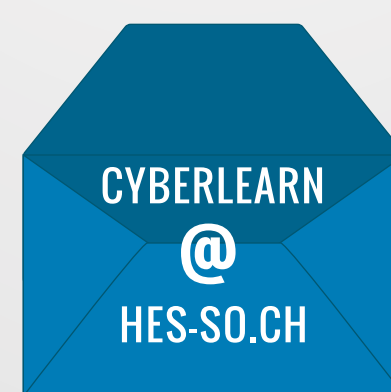

Propose questions after a brief presentation
Students vote individually, discussion in pairs
Re-launch the quiz
comment on the progression of the results

COMPARE VOTING RESULTS : SEMESTERS, SPECIFIC QUESTIONS, YEARS
