

*Epilobium fleischeri*

*Tussilago farfara*

*Erucastrum nastursifolium*

*Agrostis stolonifera*

*Typha minima*

*Lycopodium europaeus*

*Epilobium hirsutum*

A close-up photograph of the plant *Epilobium parviflorum*. The image shows several upright, hairy stems with narrow, lanceolate leaves that have serrated margins. At the top of the stems, there are clusters of small, light purple flowers with five petals and prominent stamens. Some flowers are fully open, while others are in the bud stage. The background is a soft-focus green, suggesting a natural, outdoor setting.

*Epilobium parviflorum*

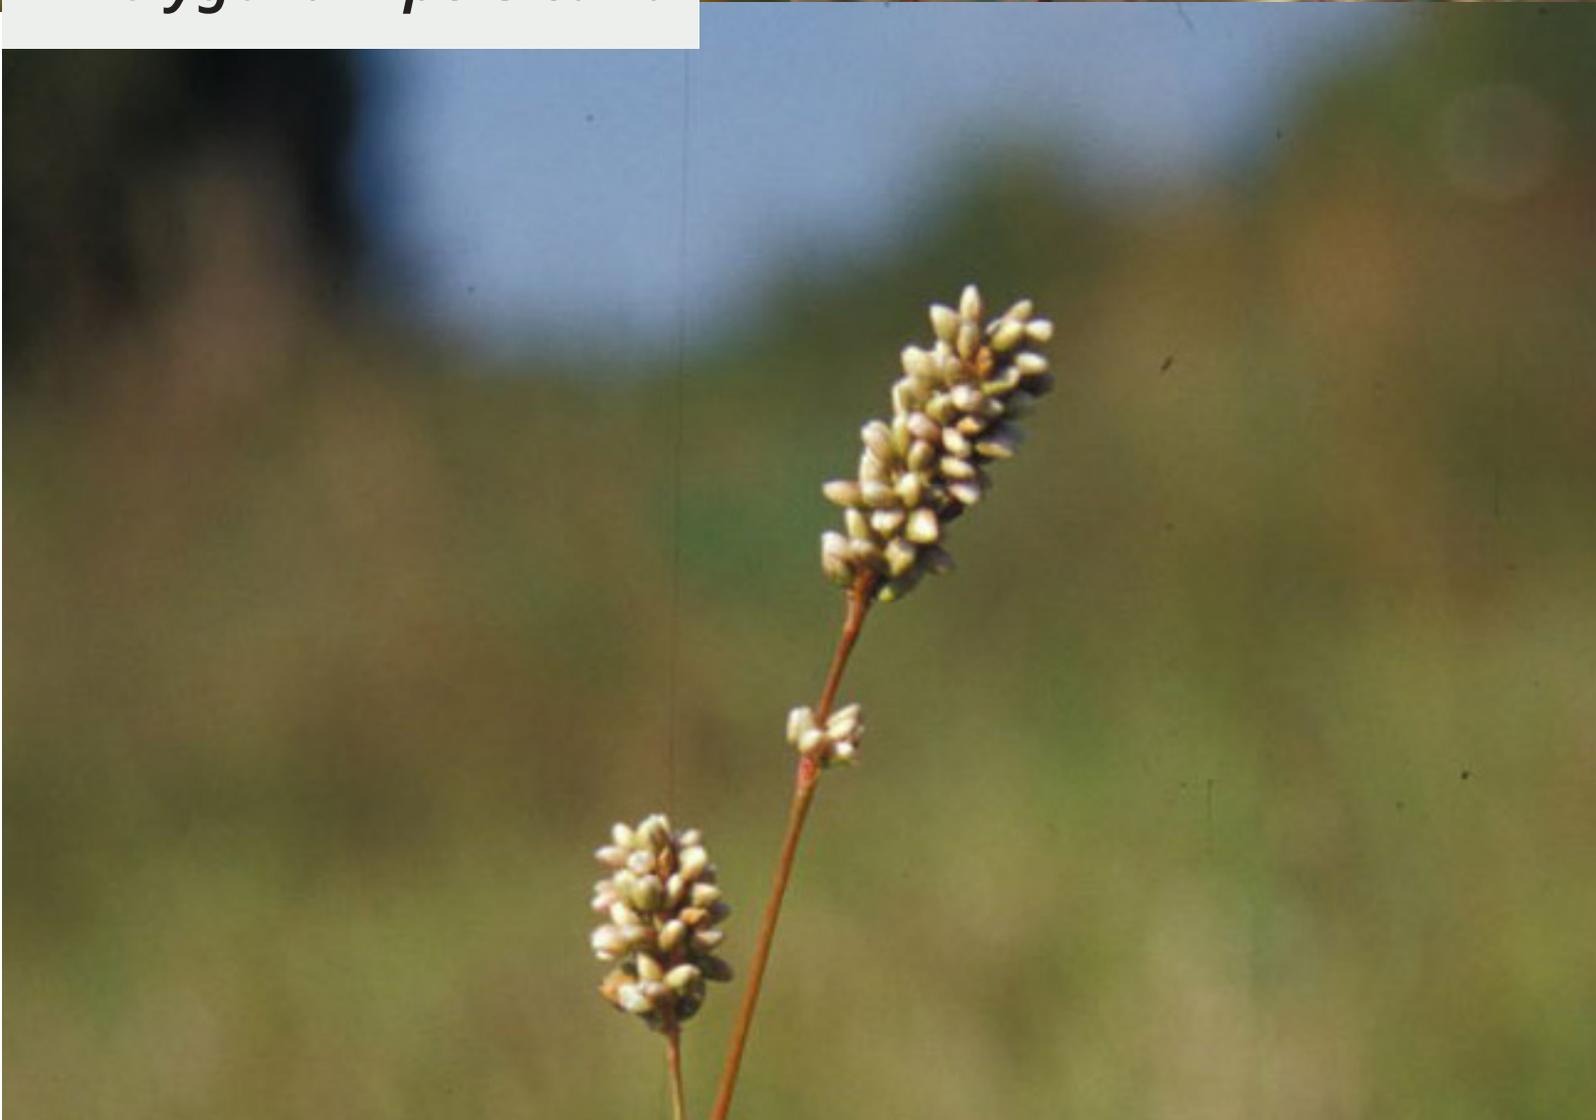

*Polygonum aviculare*

*Polygonum persicaria*

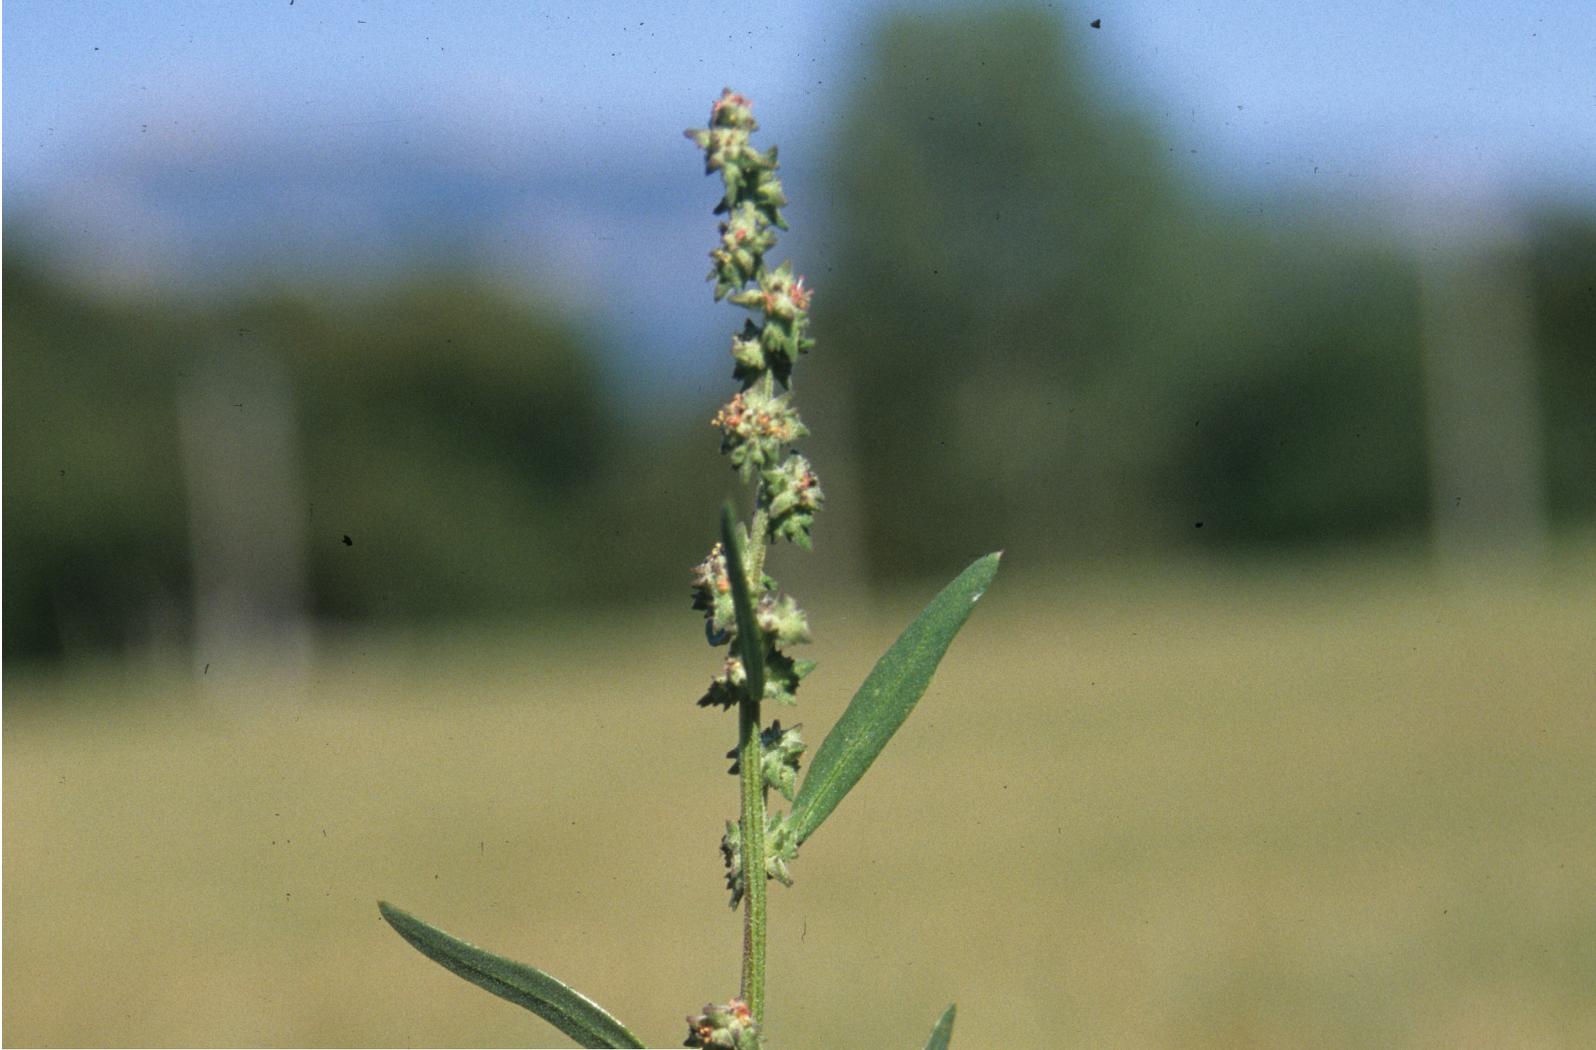

*Barbarea vulgaris*

*Reseda lutea*

*Atriplex patula*

*Melilotus albus*

*Setaria viridis*

*Panicum capillare*

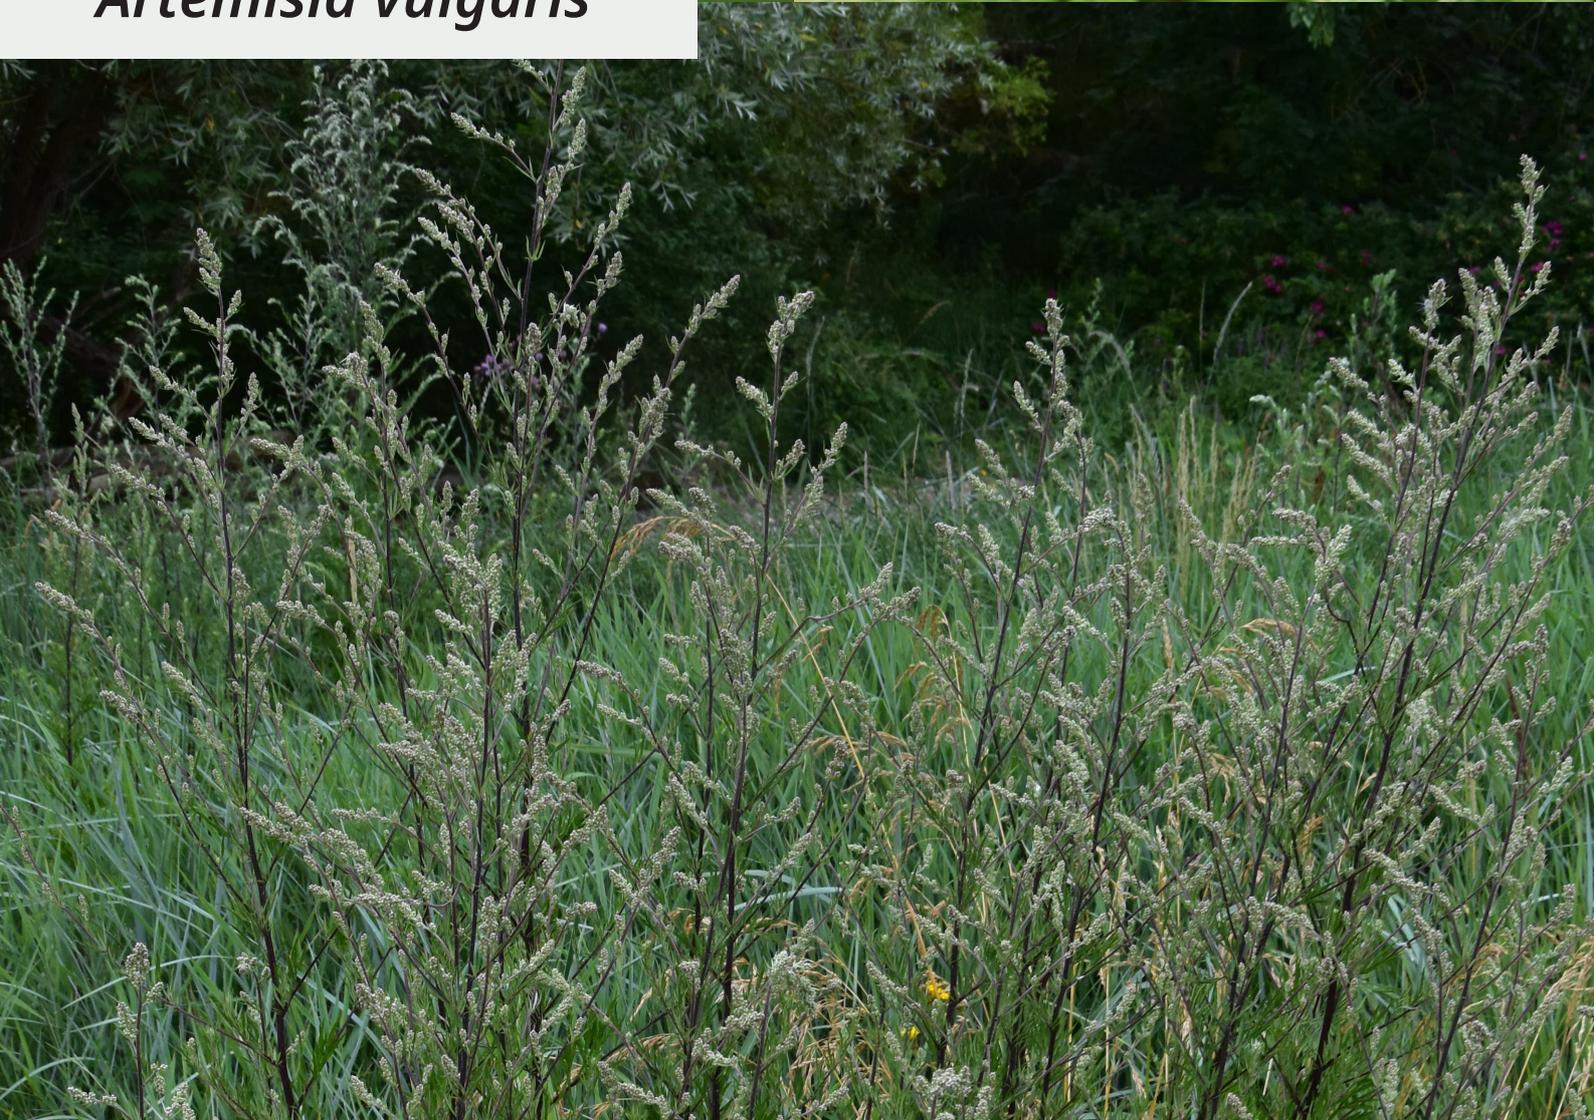

*Daucus carota*

*Artemisia vulgaris*

*Buddleia davidii*

*Gypsophila repens*

*Chaenorrhinum minus*
