SCIRE: Spinal Cord Injury Rehabilitation Evidence

<http://www.scireproject.com/>

The Spinal Cord Injury Rehabilitation Evidence (SCIRE) covers a comprehensive set of topics relevant to SCI rehabilitation and community reintegration. SCIRE reviews, evaluates, and translates existing research knowledge into a clear and concise format to inform health professionals and other stakeholders of best rehabilitation practices following SCI.

The Evidence-Based Review of Moderate To Severe Acquired Brain Injury

<http://www.abiebr.com>

The Evidence-Based Review of Moderate To Severe Acquired Brain Injury (ABIEBR) is a joint project to develop an evidence-based review of the literature for rehabilitation or rehabilitation-related interventions for ABI. The principle of the ABIEBR is to improve the quality of ABI rehabilitation by synthesizing the current literature into a utilizable format and laying the foundation for effective knowledge transfer to improve programs and services.

EBSR: Evidence-Based Review of Stroke Rehabilitation

www.ebsr.com/

The Evidence-Based Review of Stroke Rehabilitation (EBSR) is the most comprehensive and up-to-date review available examining both therapy-based and pharmacological interventions associated with stroke rehabilitation. We continue to update the review regularly, with the aim of providing a comprehensive, easily accessible review, which will help to facilitate a best-practice approach to stroke rehabilitation.

StrokEngine

<http://strokengine.ca/>

This site focuses on stroke rehabilitation topics and interventions. Information is derived from quality articles, websites and systematic reviews. All have been reviewed using a systematic process.

Consortium of Multiple Sclerosis Centers

<http://www.ms-care.org/cmssc/index.php>

OUR MISSION: To be the preeminent professional organization for Multiple Sclerosis healthcare providers and researchers in North America, and a valued partner in the global MS community. Our core purpose is to maximize the ability of MS healthcare providers to impact care of people who are affected by MS, thus improving their quality of life.

NHS Evidence

<http://www.evidence.nhs.uk/topics>

NHS Evidence is a service that enables access to authoritative clinical and non-clinical evidence and best practice through a web-based portal. It helps people from across the NHS, public health and social care sectors to make better decisions as a result. NHS Evidence is managed by the National Institute for Health and Clinical Excellence (NICE).
